**Subject:** Supplemental Statements

Michael -

As we discussed last week, the purpose of this e-mail is to request the reprinting of the most recent Supplemental Statement of Water Division and Use form applicable to Browns Valley Irrigation District's Pre-1914 Section 12 Filing, Z001986. We are requesting the reprinting of this Supplemental Statement in order to report recent water use on behalf of Browns Valley ID. At your earliest convenience, please provide our office with this Supplemental Statement at the address identified below. At this time, we do not have additional Statements for which we require reprinting of the Supplemental Statements:

In advance, thank you for your assistance! Please call if you have any questions.

Darren

**ATTACHMENT TO  
STATEMENT OF WATER DIVERSION AND USE**

B. The use of water identified in this Statement of Water Diversion and Use are made under Browns Valley Irrigation District's (BVID) pre-1914 water rights as identified in the certificate issued by the State Water Commission of California pursuant to Application 12-1986 dated April 14, 1921.

D. From 1890 to 1990, diversions were made at BVID's Upper Main Canal located within SE 1/4, NW 1/4, Section 25, T18N, R7E, MDB&M in Yuba County.

From 1964 to 1990, diversions were also made at BVID's Pumpline Canal Diversion located within SE 1/4 NE 1/4, Section 29, T16N, R5E, MDB&M in Yuba County.

In 1990, as part of its water conservation project, BVID terminated deliveries from its Upper Main Canal which was difficult to maintain and experienced high losses. Since 1990, BVID has transferred this conservation water previously diverted at the Upper Main Canal. See BVID Resolution No. 3-7-90-1, a copy of which is attached hereto.

Diversions by BVID under its pre-1914 water rights are currently made at its Pumpline Canal Diversion.

G. Water is diverted year round by BVID at the Pumpline Canal Diversion. In addition to these diversions, BVID has transferred the water previously diverted at its Upper Main Canal made available by its conservation project as follows:

Year	Transfer To	Amount
1990	Grey Lodge National Wildlife Refuge	5,000 AF
1991 & 1992	State Water Bank	5,500 AF/year
1993-1996	Sutter Bypass - Butte Slough Water Users Association	5,500 AF/year
1997	Yuba County Water Agency as part of 25,000 AF transfer to the Bureau of Reclamation	5,000 AF

**RESOLUTION NO. 3-7-90-1****OF THE BOARD OF DIRECTORS OF  
BROWNS VALLEY IRRIGATION DISTRICT  
CURTAILING WATER DIVERSIONS AT NY10  
AND WATER DELIVERIES FROM THE UPPER MAIN CANAL**

WHEREAS, the Upper Main Canal consists of many miles of flumes, ditches and other facilities for delivering water from the NY10 diversion to lands within the District;

WHEREAS, the District plans to construct a water conservation project known as the Upper Main Pipeline Project by the 1991 irrigation season to deliver irrigation water to the lands presently served by the Upper Main Canal, after which diversions at NY10 and use of the Upper Main Canal would be terminated. This project will eliminate the ditch losses experienced on the Upper Main Canal;

WHEREAS, the 5,500 acre-feet of water previously diverted for use at the Upper Main Canal will be available for use, sale, lease, exchange or transfer inside or outside of the District, downstream of the Yuba River Development Project, as a result of this water conservation project;

WHEREAS, in light of the District's plan to terminate water deliveries from the Upper Main Canal in 1991, it would not be cost effective to perform maintenance work necessary to use the Upper Main Canal in 1990 to provide reliable water service.

NOW, THEREFORE, be it resolved by the Board of Directors as follows:

1. The foregoing recitals are true and are incorporated by this reference.

2. The Board hereby finds and determines (a) it is not cost effective to provide water service from the Upper Main during 1990, and (b) the District plans to implement the Upper Main Pipeline Water Conservation Project to have an alternative means of providing water service to the lands served by the Upper Main, commencing during the 1991 irrigation season.

3. The Board hereby orders water diversions from NY10 and water deliveries from the Upper Main Canal be terminated, during 1990 and thereafter, unless and until the Board directs that such diversions and water service be resumed.

4. The Board hereby declares that it abandons no right, title or interest in any District water rights, easements, rights

of way or facilities as a result of this Resolution, including but not limited to the NY10 diversion or the Upper Main Canal.

5. The Manager is hereby authorized and directed to notify affected landowners of such actions, and to cooperate with such landowners in providing interim water supplies during 1990, to the extent reasonably feasible.

6. Pursuant to California Water Code sections 1011 and 1706, the District intends to sell, lease, exchange or otherwise transfer for use within or outside the boundaries of the District the 5,500 acre-feet of water previously diverted for use from the Upper Main Canal, the use of which from the Upper Main Canal will henceforth cease as a result of its water conservataion project.

The foregoing Resolution was duly passed and adopted by the Board of Directors at a meeting thereof held on March 7, 1990, by the following roll call vote:

AYES: La Mantia, Smith, Bordsen, Cote, Misler  
NOES: None  
ABSENT: None

Signed by me after its passage this 7th day of March 1990.

By: Ted La Mantia
